# re|define practice protocol

## New Private Label Garments

We are proud to offer a great branding opportunity for your practice. Similar to our customized gel packs, we now offer a private label service where we can put your practice logo and information on our garments. It is a great way for you to show your patients how much you care for their post-op healing.

- Mix and match sizes and styles\*
  - Minimum order quantity 50
  - One time set-up fee \$100.00
- \* Customized garments are not returnable

## Compression Garments

The use of a supportive compression garment is an integral element of the post surgical healing process. Wearing a compression garment designed for your particular procedure helps minimize bruising and swelling. The compression from the garment will hold the surgical area firmly in place, aiding in the proper retraction and intended body contouring.

### Stage 1 Brazilian Above the Knee Body Shaper

Ideal for immediate use following butt implants, Brazilian Butt Lifts, and natural fat transfer to the buttocks. With gluteal cutouts, the Brazilian Body Shaper provides full compression to the surrounding areas with built-in relief for the buttocks to ensure there is no compression or collapse of the implantation area. Stitching around the gluteal cutout is intentionally loose so that it can grow with the patient, reducing post-op indentations. Made with Sateen fabric for the ultimate in compression and comfort. Designed with outside seams, hook & eye beneath side zipper closure, and an open crotch.

Sizes: XS - 2X Color: Beige, Black  
Size 3X is available in Black.

## Stage 1 Girdles

**Above the Knee Girdle SC-210**

**Below the Knee Girdle SC-215**

*4" Waistband, Non-Separating Zippers*

Featuring a 4" anti-roll waist band and a front reinforcement panel, these garments are ideal for use following abdominoplasty and liposuction of the abdomen and lower body. Sleek design features hook & eye beneath bilateral zipper closure, reinforced flat outside seams and an open crotch. Made with our breathable, self-wicking SuperSilky fabric to provide the ultimate in comfort.

Sizes: XS - 2X Color: Beige, Black

## Stage 1 Brazilian High Back Below the Knee Girdle

Ideal for immediate use following Brazilian Butt Lifts, butt augmentations, fat transfer and grafting, abdominoplasty, and liposuction of the abdomen, thighs and the upper and lower back. Provides full body support and includes reinforcement panels on the upper thighs to help lift the buttocks. Features lightweight, non-compressive cotton gluteal insets to help ensure there is no collapse or heightened compression on the gluteal area. Open bust design with adjustable hook & eye front center closure, an open crotch, and adjustable shoulder straps for added convenience and comfort. Also includes a set of removable foam inserts at the small of the back to help cinch the waist, enhance compression, and sculpt the top of the buttocks. Made with ultra-compressive, memory resilient Sateen fabric that is antimicrobial, self-wicking, and comfortable for an even, contoured fit.

Sizes: XS - 2X Color: Black

## Let your practice speak for itself...

We make it easy to personalize products with your practice logo, enhancing your professional image.

## Stage 2 Brazilian High Back Girdle

Made from SuperSilky fabric, this mid-thigh garment features a cotton gluteal backing to ensure the right amount of coverage and ongoing compression is applied during the extended post-op recovery period. The design prevents indentations and allows for more flexibility where the fat is placed. Features an open bust design and adjustable shoulder straps with two front attachment options for added comfort. These girdles are easy to pull on, for they have no hook & eye or zippers. Ideal for use following Brazilian Butt Lifts, butt augmentations, and fat transfer procedures.

Sizes: XS - 2X Color: Black

- XL/Black** (125-0308)
- 2X/Black** (125-0309)

## Stage 2 Brazilian Girdle

Designed for extended recovery following Brazilian Butt Lift procedures, as well as natural fat transfer and augmentation of the buttocks. The girdle provides full compression to the areas used for fat grafting, including abdomen and thighs but has gluteal cutouts to alleviate compression to the buttock augmentation site. Reinforced upper thigh helps lift the buttocks and a reinforced abdominal panel provides added compression. Stitching around the gluteal cutout is intentionally loose so that it can grow with the patient, reducing post-op indentations. These girdles are easy to pull on, for they have no hook & eye or zippers. Made with ultra-soft SuperSilky fabric for the ultimate in patient comfort and compression.

# Cold Therapy

## 4" Soft-sided Round Gel Packs

Ideal for a variety of cold therapy applications. These sturdy, reusable gel packs remain flexible when frozen and provide uniform cold therapy for an extended period of time. They feature one soft-sided surface that shields the skin from direct contact with the frozen pack. They are a convenient, comfortable and economical cold therapy application for your patients and can easily be customized with your logo and/or practice information.
