© 2017 Henry Schein, Inc. No copying without permission. Not responsible for typographical errors. Note: Participating in a promotional discount program (e.g., points, discount redemptions or other special awards) is only permissible in accordance with discount program rules. By participation in such program, you agree that, to your knowledge, your practice complies with the program requirements. For HS promotions: This promotion offers a bundled discount. The cost of any "buy/get" (or "no charge") items is a discount applied to your other purchases on the same invoice. The reportable value (unit price) of the "no charge" item will be identified on the invoice. To calculate the applicable discount on the other items on the same invoice, divide the total value (unit price(s)) of any no-charge item(s) by the total value (extension price(s)) of all other items purchased on the same invoice, and apply the resulting percentage equally to each item to determine net prices. For manufacturer promotions: The prices stated in the invoice or statement may reflect a discount or be subject to a rebate. You must fully and accurately report this stated discount price, or if applicable, any net pricing, after giving effect to any rebates, to Medicare, Medicaid, Tricare and any other federal or State program upon request by any such program. Accordingly, you should retain these records. It is your responsibility to review any agreements or other documents applicable to these prices to determine if they are subject to a rebate.

At Henry Schein, protecting the richness and beauty of our planet is a key pillar of our commitment to

## “helping health happen.”

Whether our Team Schein Members are finding new ways to conserve energy at the workplace or improving our facilities to receive LEED certification, we continue to support programs that reduce our carbon footprint and promote sustainability.

To help others “**go green,**” Henry Schein offers customers the opportunity to purchase environmentally friendly products for their practices.

Printed on recycled paper.  
Please recycle it again.

## Managing Our Environmental Footprint

We believe that an important part of helping health happen is protecting the health of our environment. We embrace environmental stewardship by:

- **Better managing our energy consumption.**

We have made significant improvements to the energy efficiency of the lighting at our facilities, such as:

- ~ Replacing all the metal halide parking lot light fixtures with technologically advanced LED site lighting at our headquarters in Melville, NY
- ~ Installing motion-activated light sensors throughout our offices
- ~ Reducing energy consumption by more than 28% at U.S. distribution centers

- **Supporting the use of recycled material in our facilities throughout the world.**

We have programs to recycle aluminum, glass, computers, electronic equipment, printers, and toner cartridges. Henry Schein's shipping cartons are made from recycled material, which require less energy and material to manufacture. Our distribution centers also purchase ecofriendly and recycled supplies including copy paper, printer cartridges, packing dunnage, corrugated material, and cleaning products. Our distribution centers also recycle everything from plastic bottles to pallets.

- **Achieving LEED certification at our facilities.**

The Melville East building, one of two buildings that comprise Henry Schein's world headquarters on Long Island, New York, was awarded LEED® Silver Certification in the Building Operations and Maintenance rating system in 2015. The second building, Melville West, was awarded LEED Silver Certification in 2013. This certification recognizes the continued efforts of the company's corporate offices to conserve energy and water, reduce waste and greenhouse gas emissions, and to be safer and healthier for team members. Specifically, Melville East replaced outdated and inefficient fuel oil boilers with two new condensing-style dual-fuel boilers for improved equipment efficiency. Meanwhile, Melville West added a "cool roof" membrane made of a single-ply, tri-polymer alloy with reflective characteristics, thereby reducing our reliance on air conditioning to control temperatures.

- **Supporting the environmental sustainability efforts of our customers.**

We encourage the “greening” of health professionals’ offices, create office spaces that meet world-recognized sustainability and green design standards, and support the reduction of our customers’ total carbon footprint with the use of ecofriendly products through our Global Reflections program. Henry Schein partners with transportation operations that participate in the EPA’s “SmartWay” program, a public private collaboration that helps us transport our goods in the cleanest, most efficient way possible.

#### **Leadership in Greener Purchasing Award**

Henry Schein received a Leadership in Greener Purchasing Award from Office Depot. Henry Schein was one of 28 award winners out of 17,000 Office Depot customers, and the award gave special recognition to Henry Schein for its leadership in purchasing of LEED-related products.

OVER  
**9,500**  
TONS OF WASTE  
MATERIAL RECYCLED  
by our North American  
Distribution Centers

Henry Schein’s Global Reflections program helps dental, veterinary, and medical practices **“go green”** by offering a catalog of environmentally friendly and green-certified products, including medical, cleaning, office, and sanitary supplies.

# Unique EZ Access® Cartons from GP PRO

Designed to deliver a unique level of convenience for medical offices.

The exclusive EZ Access® cartons are smaller, color-coded and feature perforated openings to help make shopping, finding, handling, storing, displaying, and accessing products easier and faster in limited space. They're offered at a smart price point and meet the requirements of the Sustainable Forestry Initiative® chain of custody standard: 100% SFI Certified Sourcing.

HS Item #	Description	Quantity

# MINIMIZING THE IMPACT WITH *StarMed*® PLUS™ Nitrile Exam PF

That's how we **GLOVE** the **PLANET**®

Glove the Planet® is Sempermed USA Inc.'s commitment to reducing our environmental impact. By thinking ahead and consuming less we're able to do more to minimize our global footprint with every step we take.

By packaging 300 (250 XL) gloves instead of the usual 100 gloves per box for our most popular nitrile exam products, we help you save time and money that would otherwise be spent on restocking your glove supply. With more product in every box, you'll also be able to make more efficient use of your storage space. And, fewer boxes mean less waste, less mess and fewer trips to the trash!

# A new SMART Pack for your Busy Workplace

Ansell introduces new packaging  
 for surgical gloves

## Smarter Space Saver

Space is at a premium in the O.R. and the new SMART Packs help customers save space. While each box contains the same amount of pairs, they are smaller, saving 54% shelf space.

## Smarter for the Environment

Smaller pouches. Smaller glove boxes. Smaller cases. This all scales down to less plastic and cardboard waste, as well as reduced carbon footprint from less CO<sub>2</sub> emissions. Together with our hospitals, we at Ansell are helping fuel a greener world.

## Smarter User-friendly Functionality

The new SMART Pack fits into the way end users work with a range of improvements versus current packs, while maintaining current valued features. The range of functional features for each of the packaging elements are described below.

### Encore® Perry Style 42® PF

Size	HS Item #	Packaging
Size 5.5	[126-4065]	50 Pairs / Dispensing Box 4 Boxes / Case

# Composting: Throw in the towel. Enrich the Earth.

It's a win-win for the bottom line and the environment.

**42%** EPA concludes 42 percent of U.S. greenhouse gas emissions could be avoided via recycling and composting in 2009.<sup>1</sup>

**28%** Paper product waste = 28% of total solid waste in 2012<sup>2</sup>

## Why compost?

- It's a way to divert from landfill
- A step toward "zero waste"
- It reduces greenhouse gas emissions

## Did you know that all Kimberly-Clark Professional paper towels are compostable?<sup>4</sup>

Every towel can be diverted from a landfill and turned into compost – a nutrient-rich material used to fertilize crops, plants and flowers.

## What is composting?

Composting is nature's way of recycling. It produces nutrient-rich gardening mulch with many environmental benefits such as:

- Improving soil quality and environment for growth
- Reducing the need for water, fertilizers, or pesticides<sup>3</sup>
- Providing rich soil for help with drought resistance<sup>3</sup>

## How it works

- 1 Drop used towels into designated bins
- 2 Collect towels, which are delivered to a composting facility
- 3 Towel waste is turned into compost, and returned to the soil

## Success in Composting – is Healthcare next?

- The University of Alberta added Scott® Brand Towels to its composting process to absorb wetness, supply carbon and act as a bulking agent.
- A recent office building paper towel composting trial led to the diversion of 2,500 lbs. of waste in a four-week period.

Say "YES" to composting! You've got nothing to lose but your solid waste.

<sup>1</sup> "Waste and Recycling Facts." Clean Air Council.  
<sup>2</sup> "Municipal Solid Waste." Environmental Protection Agency.  
<sup>3</sup> "Environmental Benefits." Environmental Protection Agency.  
<sup>4</sup> All Kimberly-Clark Professional paper towels can be aerobically composted in municipal or industrial facilities in the United States and Canada by ASTM D6868-11.

# GREEN SOLUTIONS *for* STERILE PROCESSING

*Crosstex/SPS Medical is dedicated to reducing our environmental impact and providing eco-friendly products to the medical community.*

**REUSABLE** **THE LANTOR CUBE®**  
A reusable Bowie-Dick Test Pack for dynamic-air-removal sterilizers.  
Reduces waste, reduces inventory and saves money over single-use test packs.  
HS Item #: (117-7549), (421-1100)

**SMALLER FOOTPRINT** **AirView™ II BOWIE-DICK TYPE TEST PACK**  
A compact, single use Bowie-Dick Test Pack for prevacuum sterilizers.  
Ink chemistry manufactured free of heavy metals.  
HS Item #: (570-0309)

**NO HEAVY METALS** **LF2 STEAM INDICATOR TAPE**  
Steam indicator tape manufactured free of lead and latex.  
Safer for patients, employees, and the environment.  
HS Item #: (120-0171), (120-0172)

**NON-CORROSIVE** **CLEANING & HLD**  
OPA: Longer use period reduces change-out/disposal.  
SANI Prozyme: Neutral pH, phosphate-free.  
HS Item #: (633-0019), (337-7961)

Ask for these other eco-friendly, biodegradable products from Crosstex/SPS Medical: **CSR STERILIZATION WRAP** HS Item #: (107-8142), **UltraPure® NON-WOVEN SPONGES** HS Item #: (107-3837)

## Top Tip for a greener Practice

**Recycle** - Put recycle bins everywhere that your staff may need them. Check with your waste management company to learn how to recycle items that don't get picked up on a regular basis (batteries, paint, electronics, etc.).

### EarthSense® Commercial Recycled Can Liners—Webster, a Division of AEP Industries, Inc.

(Formerly Reclaim 100®)  
Convenience pack trash liners have opaque, heavy-duty plastic that conceals contents.  
SCS-certified: 75% total recycled plastic with 10% postconsumer recycled content.

13 Gallons—White—24" x 33" (107-6221)..... 150 per Box  
33 Gallons—Black—32½" x 40" (121-7387)..... 80 per Box

### Slim-Jim® Recyclable Waste Containers—Rubbermaid®

Feature integrated venting channels for easier liner removal. 30"H x 22"W. Lids sold separately.  
For waste separation, choose the slotted blue top for paper or the round-hole green top for glass bottles, jars, and cans.

# BD's approach to Sustainability

## INNOVATION

Healthcare safety, reach & cost

## ACCESS

Healthcare in Resource-limited populations

## EFFICIENCY

Environmentally sound products & resilient operation

## EMPOWERMENT

Positive workforce & community impacts

## 2020 Sustainability Goals – Efficiency:

- Reduce** greenhouse gas (GHG) emissions throughout BD's operations and value chain:
  - Scope 1 & 2 GHG emissions by 50% (normalized)
  - Baseline Scope 3 GHG emissions
- Minimize** environmental footprint in manufacturing (normalized, 2008 baseline):
  - 40% energy reduction
  - 50% of total energy from renewables (absolute)
  - 40% water reduction
  - 50% total waste reduction
  - 70% increase recycling (absolute)
  - 65% reduction in VOC/ HAP emissions
  - 95% reduction in ozone-depleting emissions
  - 100% elimination of HCFC 141b
- Establish** supplier evaluation methodology for social and environmental responsibility
- Eliminate** priority materials of concern in the following product families:
  - Devices: PVC & phthalates
  - Instruments: phthalates, brominated flame retardants, heavy metals
  - Packaging: PVC and expanded polystyrene
- Improve** lifecycle impacts of current and future products

## 2016 Achievements:

- ↓ 58% Scope 1 & 2 GHG Emissions
- ↑ 43% renewable energy
- ↓ 34% water consumption
- ↑ 68% recycling rate

## Awards & Recognition

## Program Participation

Read more about our 2020 goals: [www.bd.com/sustainability](http://www.bd.com/sustainability)

Trees use solar power to take carbon emissions out of the air and store it in the wood we use. Wood products also use less energy to make into finished products than plastics or steel. Wooden Mallet only uses Northern Red Oak and other wood products that are grown in sustained forests in the United States. To further reduce our environmental impact, Wooden Mallet recycles all of our scrap wood and cardboard. Scrap wood chips are burned as the heat source for our production, warehouse and office facilities. During warm weather, the wood chips are donated to local farmers for use as animal bedding.

# Henry Schein now offers solutions for **compliant pharmaceutical returns!**

Our solutions portfolio features a unique reverse pharmaceutical distribution service for expired pharmaceuticals that ensures compliant destruction (pay as you go) with credit options if applicable.

**1**

## Environmentally Safe

Our new solution is compliant with the Food and Drug Administration (FDA), Drug Enforcement Agency (DEA) and the Environmental Protection Agency (EPA) nationwide. This ensures a compliant, environmentally-safe disposition of your pharmaceuticals.

**2**

## All in One Box!

You can put all of the following pharmaceuticals in ONE box for compliant return\*:

- Schedule II (CII)s
- Schedule III-V (CIIIs – CVs)
- All Non-Controlled Pharmaceuticals (Rx, OTCs, Hazardous and Compounds)

*\*Vaccines and in-date products are not accepted and should go through the general return process.*

**3**

## Credit Options

Henry Schein's MedSafe Easy Pak solution has the capability to apply credits to your account if applicable.

At Henry Schein, we believe that an important part of “helping health happen” is protecting the health of planet earth. Committed to doing our part, Henry Schein embraces environmental stewardship as a pillar of our corporate social responsibility efforts. As a trusted advisor to our customers, we help health professionals who are concerned about the environment to “green” their practice. We work with more than 19,000 Team Schein Members around the world to ensure that each member of the Henry Schein family has the tools and information they need to minimize our footprint on the environment.

At Henry Schein,  
we firmly believe that,  
together we can  
make a difference.
